## Authorized Ford Fleet Training

Ford Motor knows how important it is for you to keep your fleet on the road. If your vehicles are maintained through in-house Facilities, Ford offers the following Fleet technical training courses at CPS's facilities.

**Advanced Electronics Operation, Diagnosis, and Service – 3-day** - Networks and computer controls are the infrastructure of modern vehicles. Every system from the brakes to the suspension, to the engine and transmission depend on networks and modules to keep a vehicle at peak performance. This hands-on training class delivers the skills and knowledge required for service technicians to working this computer-controlled environment. This training provides skills and knowledge on:

- Network operation and symptoms of failure
- Control module diagnosis and programming
- Multiple network integration and dependencies

The course is recommended for technicians that have completed the Ford Fleet Electrical and Electronics training, and/or advanced electrical skills.

**DURATION:** 3 Days
